moodlemoot MALAYSIA 2024

What is MoodleMoot™?

A MoodleMoot™ is a conference about Learning Management System (eLearning) and related products.

MoodleMoot™ conferences bring together the Moodle Community in each region to share best practices and improve the quality of education and training globally. They can be online or face to face. The aim of these events is to bring together professionals within the Education, Research, Development, Workplace Training and EdTech sectors to share, learn and connect with the Moodle community.

Inaugural MoodleMoot™ Malaysia

MoodleMoot are dedicated conferences for users, developers, and administrators of the popular open-source learning management system, Moodle. Typically spanning a day, these events are held in venues conducive to discussions and collaborations among the Moodle community, offering workshops, presentations, and forums.

The first-ever MoodleMoot in Malaysia invites educators to share knowledge and learn together. This event aims to stimulate community growth by fostering collaboration, discussing emerging trends, and addressing technical challenges. Throughout the day, participants will explore how Moodle can effectively support evolving trends in education and training.
